Kusala Rajendran

-SEISMOLOGY-

Kusala Rajendran is a female scientist who studies about earthquakes. She was born in India and studied about seismology at University of South Carolina. She is currently a professor at the Centre of Earth and Sciences, USA. Some of her interests are, Seismology, Paleoseismology and Tectonics. Kusala Rajendran is the number one seismologist in India. Many girls are great scientists and that's no problem. Both girls and boys have the right to be scientists no matter what!
